

ESOS PHASE 2

Qualifying organisations must complete the second phase of the scheme by the 5th December 2019.

Eligible organisations need to review their total energy consumption, including buildings, industrial processes and transport and conduct audits to identify energy saving opportunities.

Non-compliances, such as failure to submit on time, can incur penalties from the Environment Agency (EA). Penalties range from publication of non-compliance on the EA's website, to a £50,000 fixed penalty. Fines will increase for each day of non-compliance.

There are four potential routes to compliance. Our ESOS Lead Assessors will work with you to understand the best option for your business:

ESOS Energy Audit

The first route available for ESOS compliance is to carry out an energy audit. This process gives the organisation clarity on the savings that each opportunity brings.

Green Deal Assessments

A Green Deal Assessment (GDA) includes an Energy Performance Certificate and an Occupancy Assessment. Similar to DECs, a GDA is completed by a qualified assessor.

ISO 50001 Energy Management System

If you have an accredited ISO 50001 system you will be considered to have met the obligations of the ESOS scheme, providing it covers 100% of the organisation's energy footprint.

Display Energy Certificates (DECs)

A DEC is based on the operating data of a building and comes with an advisory report. They are designed to help businesses improve the energy efficiency of their buildings.

We identified savings of **over £14m** for our ESOS Phase 1 clients

Qualification Thresholds

Any UK organisation that either...

1. Employs 250+ people, or;
2. Has an annual turnover in excess of 50 million euro and an annual balance sheet total in excess of 43 million euro or;
3. An overseas company with a UK registered establishment which meets either of the criteria above

Strength in Numbers

470 energy experts
1,800 clients
722,500 meters analysed
30 TWh of energy procured annually
£2.5bn worth of annual utilities costs managed

GO BEYOND COMPLIANCE

Do you see ESOS as a cost to your business or an investment?

Let us turn your investment into opportunity. We aim to make ESOS a revenue positive exercise for you following implementation of savings opportunities.

ESOS represents the start of an opportunity to create long term energy, cost and carbon savings which can increase a client's bottom line profit by reducing their energy overhead.

Our services include:

- ESOS compliant energy audits
- Provision of a qualified ESOS Lead Assessor to complete, oversee or review any energy audits
- Advice on the best compliance method for each area of significant consumption
- Display Energy Certificates
- Full energy consumption profiling from our advanced energy reporting system
- Creation and maintenance of a comprehensive evidence pack to store all relevant documents and information relevant to the organisation's compliance activities

Does your organisation qualify for ESOS? An accurate and compliant submission can take up to six months, so this needs your attention now.
