

**Net Zero** policy is shaping all our futures

Taking steps to reduce carbon emissions, can contribute towards climate action whilst protecting the bottom line.

**Supporting your journey to Net Zero:**

Corporate Power Purchase Agreements

On-site Generation & Storage Solutions

Monitoring & Targeting

Streamlined Energy & Carbon Reporting (SECR)

Energy Savings Opportunity Scheme (ESOS)

**Strength in Numbers**

500+ utility experts

2,800 clients

235,500 meters analysed

30 TWh of energy procured annually

£2.5bn worth of annual utilities costs managed

**INSPIRED**  
ENERGY

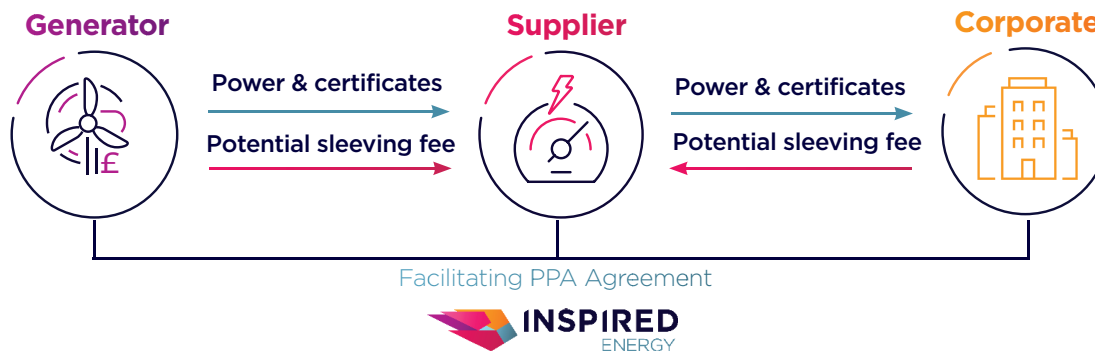

# CORPORATE POWER PURCHASE AGREEMENT

Our Corporate PPA service matches your volume requirements with renewable project developments - acting as facilitator for complex contract negotiations.

## What is a Corporate PPA?

A Corporate Power Purchase Agreement (CPPA) is a long-term energy contract between a large electricity consumer and a generator of renewable power.

Typically, a CPPA would be between one generator and one corporate offtaker, however, to allow flexibility and greater uptake a portfolio arrangement for offtakers is now also an option.

CPPAs are key to enabling large-scale off-site renewable energy development, such as wind and solar, providing zero-carbon power capacity (known as additionality) onto the grid.

Services built  
for today and  
for tomorrow

**Business Drivers for Large Corporations:**

Meet Net Zero targets and Corporate Social Responsibility (CSR) commitments

Support Environmental, Social and Governance (ESG) criteria

Brand recognition through association with new large-scale renewable energy projects

Long-term budget certainty through 10 to 15 year fixed term contracts

**Renewable Energy Guarantee of Origin (REGOs)**

REGO certificates get transferred within the CPPA mechanism providing confirmation of the source of renewable power.

# CPPA SERVICE

Providing clients with a fully managed service from assessing a client’s initial requirements through to asset performance measurement.

|  |  |
|--|--|
| <b>Market Analysis</b>                     | We match your volume requirements and timescales to our pipeline of approved developers.   |
| <b>Contract negotiation</b>                | Experienced contract negotiators secure complex CPPA mechanisms (client- generator, client-supplier)   |
| <b>Risk Management Strategy Workshop</b>   | We work closely with your team to develop a RMS tailored to your appetite to risk and select the best CPPA mechanism for your needs.                           |
| <b>Project Verification and Validation</b> | Is carried out throughout the term of your contract providing peace of mind. This includes invoice and statement validation and asset performance measurement. |
| <b>In-life management</b>                  | We take care of everything from certificate transfer, query management and validation ensuring on time payment of associated revenue streams.                  |

Helping clients to achieve their net-zero targets, providing both long-term budget certainty and additionality to the grid.
